Programme: Erasmus+ Mobility VET

Application deadline: February 2023

Draft title: Apprenticeship within the field of health care worker

Applicant organisation: Nordfjord opplæringskontor/training office. Our organization helps apprentices on their way to become a professional and skilled worker within their field of work. We promote vocational training towards companies and public sector in the Nordfjord municipalities and towards other potential coworkers.

Objective:

We wish to offer to our apprentices the chance to experience their fields in a different environment than they are used to. Also, to see the world from a new perspective and exchange knowledge with others within their field.

Nordfjord is a small region (about 38 000 inhabitants) in Norway with a spectacular nature, which offers unique coastal, mountain and fjord experiences within a range of 100 km. Nordfjord also offers a various number of industrial companies, within fishing, meat production, electro businesses and much more. During the two years of apprenticeship, our health care apprentices try out different workplaces in the region, such as nursing homes, hospital, emergency work etc. We prepare them for an important job career within providing holistic care and interaction with people with different needs, physical as well as mental.

Partner(s) in Europe: We are looking for placements in institutions – nursing home, hospitals and other relevant institutions for health care apprentices. Preferred country: Denmark. But other relevant countries are also of interest.

Planned activities (mobilities) in the project:

Health care worker.

Planned time period for placements:

February – august 2023.

Financing: Erasmus+
